# 1. Project Scoping — 10%

The purpose of this component is to define the high-level scope and goals of your project.

As introduced in Week 1, the overall project theme is “Making Life at DCU Better with LLM-Based Agents.” Projects may address areas such as learning and teaching, research, student experience and support, or university services and activities. You may also propose your own project idea, provided that it fits the scope and objectives of the module.

Your project scoping should briefly cover:

1. **Problem**

   Describe the problem you want to address, who it affects, and why it is important.

2. **Proposed LLM-Based Agent**

   Briefly describe the LLM-based agent you propose to develop, what it will do, and how it will help address the identified problem.

3. **Project Goals**

   State the main goals of the project. Focus on what you want the proposed agent to achieve rather than detailed implementation tasks.

# 2. Marking Scheme

| PART | Excellent | Satisfactory | Poor | Not satisfactory |
|---|---|---|---|---|
| Problem / Opportunity [3 marks] | Clearly identifies a meaningful problem, who it affects, and why it is worth addressing. [80% or above] | Identifies a relevant problem, but some aspects are not sufficiently clear or specific. [60–79%] | The problem is vague, too broad, or its relevance is not well explained. [50–59%] | The problem is unclear, out of scope, or missing. [below 50%] |
| Proposed LLM-Based Agent [4 marks] | Clearly explains what the proposed agent will do and how it will help address the identified problem [80% or above] | The proposed agent is relevant and generally clear, but what it will do or how it will help is not clear [60–79%] | An agent is proposed, but its purpose or connection to the identified problem is weak or unclear. [50–59%] | The proposed agent is unclear, inappropriate for the identified problem, or missing. [below 50%] |
| Project Goals [3 marks] | Goals clearly state what the project aims to achieve and are well aligned with the problem and proposed agent. [80% or above] | Goals are relevant, but some are not sufficiently clear or well defined. [60–79%] | Goals are vague, incomplete, or only partly connected to the proposed project. [50–59%] | Goals are unclear, largely unrelated to the project, or missing. [below 50%] |

# 3. Submission Guidelines

Prepare a **maximum 1-page** document in **PDF** format. The PDF File should be named in the format - '**GroupX-Phase1.pdf**', where X represents your group Number.

Please include the name and student number of all group members. Only one student from each group should submit the report on behalf of the group.

Submit the report through Loop by **Friday, 9th October.**
