

	Tuesday (3 – 4pm)	Wednesday (11am - 12pm)
Week 1 (7 Sep)	Introduction/ orientation	HCI background
Week 2 (14 Sep)	Design guidelines	Design guidelines
Week 3 (21 Sep)	Design guidelines	Design guidelines
Week 4 (28 Sep)	Design guidelines	Project brainstorming
Week 5 (5 Oct)	Guidelines recap	Guidelines recap
Week 6 (12 Oct)	Preventing negative impact	Usability evaluation
Week 7 (19 Oct)	Usability evaluation	Usability evaluation
Week 8 (26 Oct)	Usability evaluation	Usability evaluation
Week 9 (2 Nov)	Usability evaluation	Usability evaluation
Week 10 (9 Nov)	Design principles summary	Visualisation summary
Week 11 (16 Nov)	Project discussion	Project feedback
Week 12 (23 Nov)	Summary/ reflection	Summary/ reflection

CSC1058 USER INTERFACE DESIGN & IMPLEMENTATION

MODULE COORDINATOR &
LECTURER
Hyowon Lee
TEACHING ASSISTANT
Haoyan Zhang

DCU

1

WHAT WILL WE LEARN TODAY?

- Course orientation
- Background on
 - Human-Computer Interaction (HCI)
 - Interaction Design
 - Usability

URL: vevox.app design

Session ID: **156-954-547** (UX)

:

DCU

2

Module Orientation

Introductory but practical
 Lots of Q&A throughout
 3 reading materials
 2 3-people design exercises
 5-8 in-class mini activities
 1 semester-long design project
 - Involving 2 group submissions
 Journal submission each week
 No written exam

3

	Tuesday (3 – 4pm)	Wednesday (11am - 12pm)	
Week 1 (7 Sep)	Introduction/ orientation	HCI background	
Week 2 (14 Sep)	Design guidelines	Design guidelines	
Week 3 (21 Sep)	Design guidelines	Design guidelines	
Week 4 (28 Sep)	Design guidelines	Project brainstorming	
Week 5 (5 Oct)	Guidelines recap	Guidelines recap	
Week 6 (12 Oct)	Preventing negative impact	Usability evaluation	
Week 7 (19 Oct)	Usability evaluation	Usability evaluation	
Week 8 (26 Oct)	Usability evaluation	Usability evaluation	
Week 9 (2 Nov)	Usability evaluation	Usability evaluation	
Week 10 (9 Nov)	Design principles summary	Visualisation summary	
Week 11 (16 Nov)	Project discussion	Project feedback	
Week 12 (23 Nov)	Summary/ reflection	Summary/ reflection	

Design exercise 1
15%

Design exercise 2
20%

Weekly journal entry
5%

In-class activities
10%

Reflection
15%

Project: framing/ spec
15%

Project: UI design rationale & evaluation
20%

Timetable & grading

Assessment

Individual	65%
Design exercise 1 (week 3)	15%
Design exercise 2 (week 7)	20%
Activities (5-8 times during semester)	10%
Contribution report on group project (week 12)	15%
Journal keeping (weekly)	5%
Group (project)	35%
Framing the concept (week 5)	15%
UI design, rationale & evaluation (week 11)	20%

4

Use of Generative AI

If you used in any aspect of assessment, add a reflection section on the use of it (where you used, why and how you used, the degree it was beneficial to, how you would do next time, etc.)

5

By end of November, we will...

- Be able to **reason** why a UI is well-designed or not, how it can be improved
- Be able to **design** a usable and considerate UI
- Be able to **evaluate** how good/bad a UI is

6

7

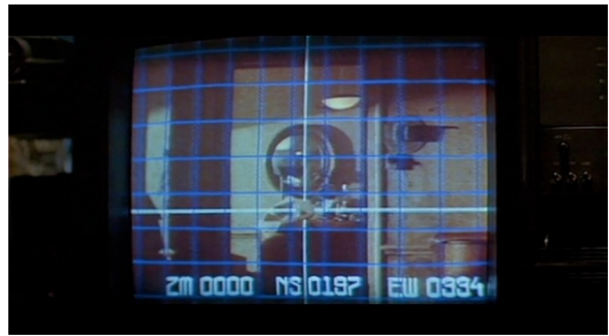

8

Discussion

from Minority Report (2002, Steven Spielberg)

from Blade Runner (1982, Ridley Scott)

9

What is involved

Academic Disciplines

Ergonomics
Psychology
Cognitive Science
Informatics
**Computer Science /
Software Engineering**
Information Systems
**Social Science (e.g.
Sociology, Anthropology)**

User Interface Design

**Computer-Supported
Cooperative Work
(CSCW)**

Design Practices

Graphic Design
Product Design
Industrial Design
Film Industry

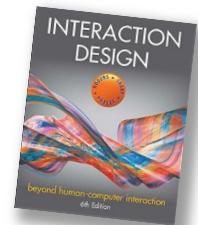

10

Some Terminology

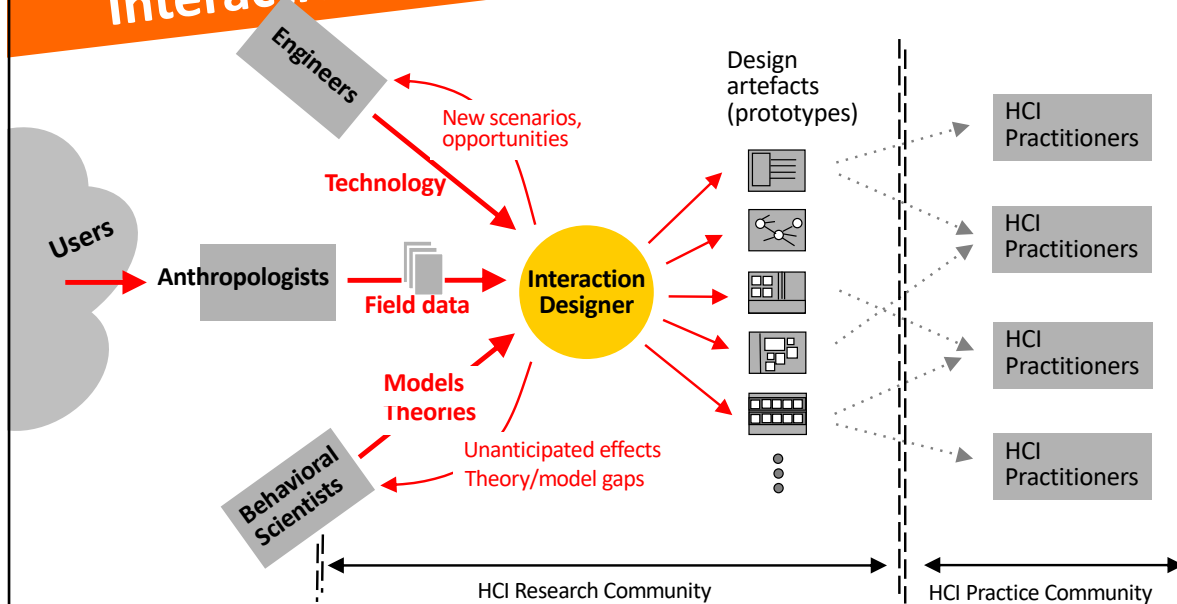

- User Interface (= Interface or UI)
- User Interface Design (= UI Design)
- Computer-Human Interaction (CHI)
- Human-Computer Interaction (HCI)
- Human-Computer Interaction Design
- Interaction Design

➔ “Designing interactive products to support the way people communicate and interact in their everyday and working lives”

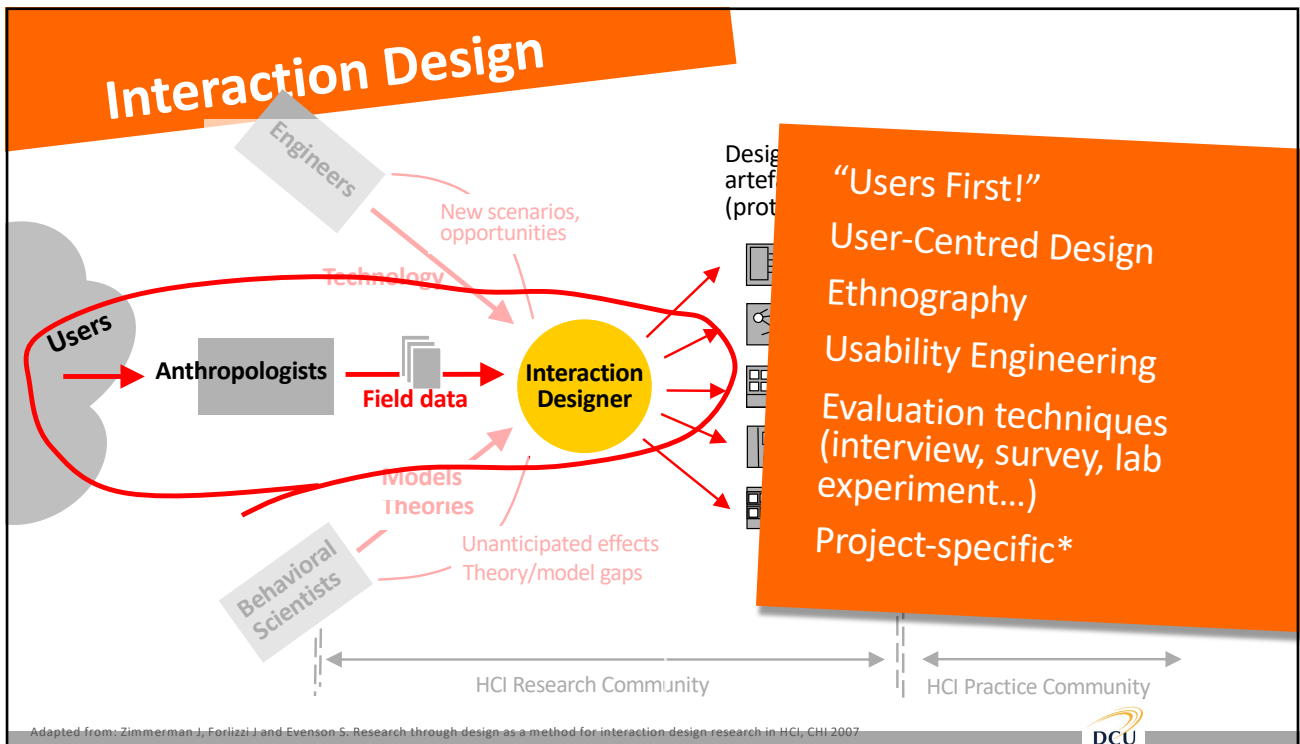

11

Interaction Design

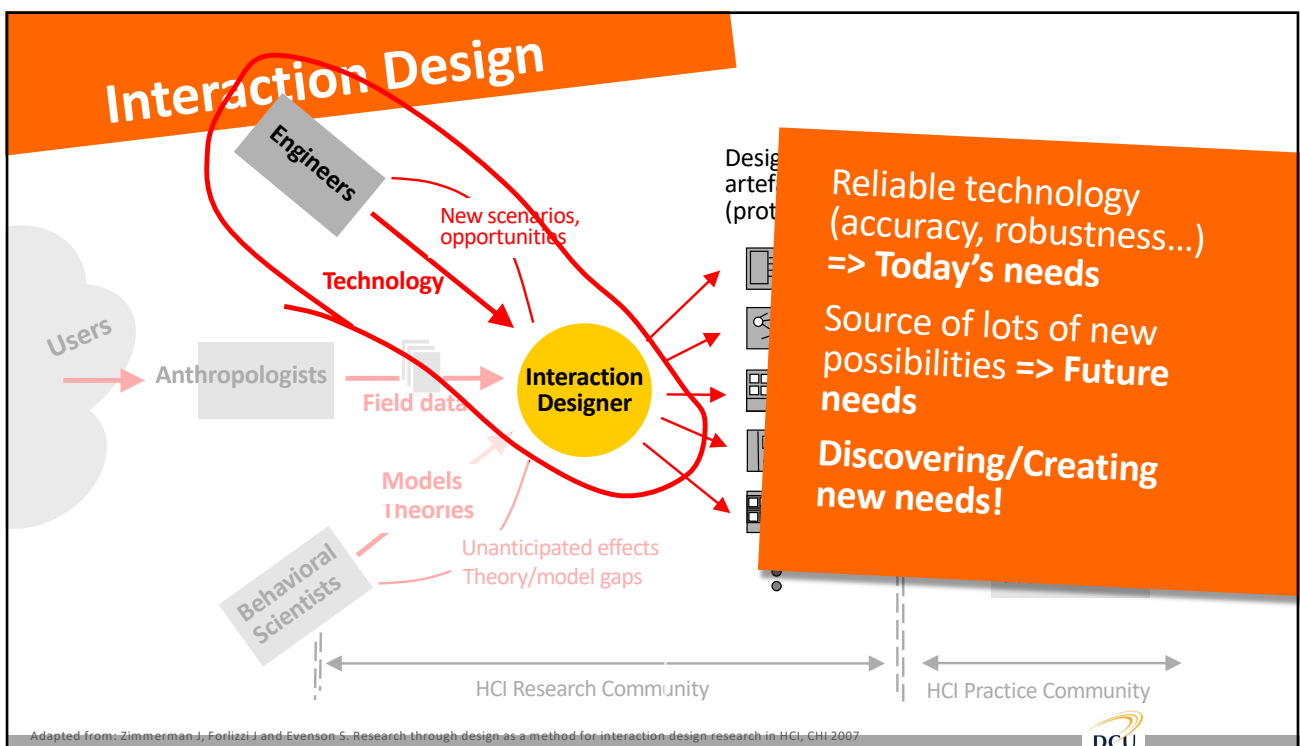

Adapted from: Zimmerman J, Forlizzi J and Evenson S. Research through design as a method for interaction design research in HCI, CHI 2007

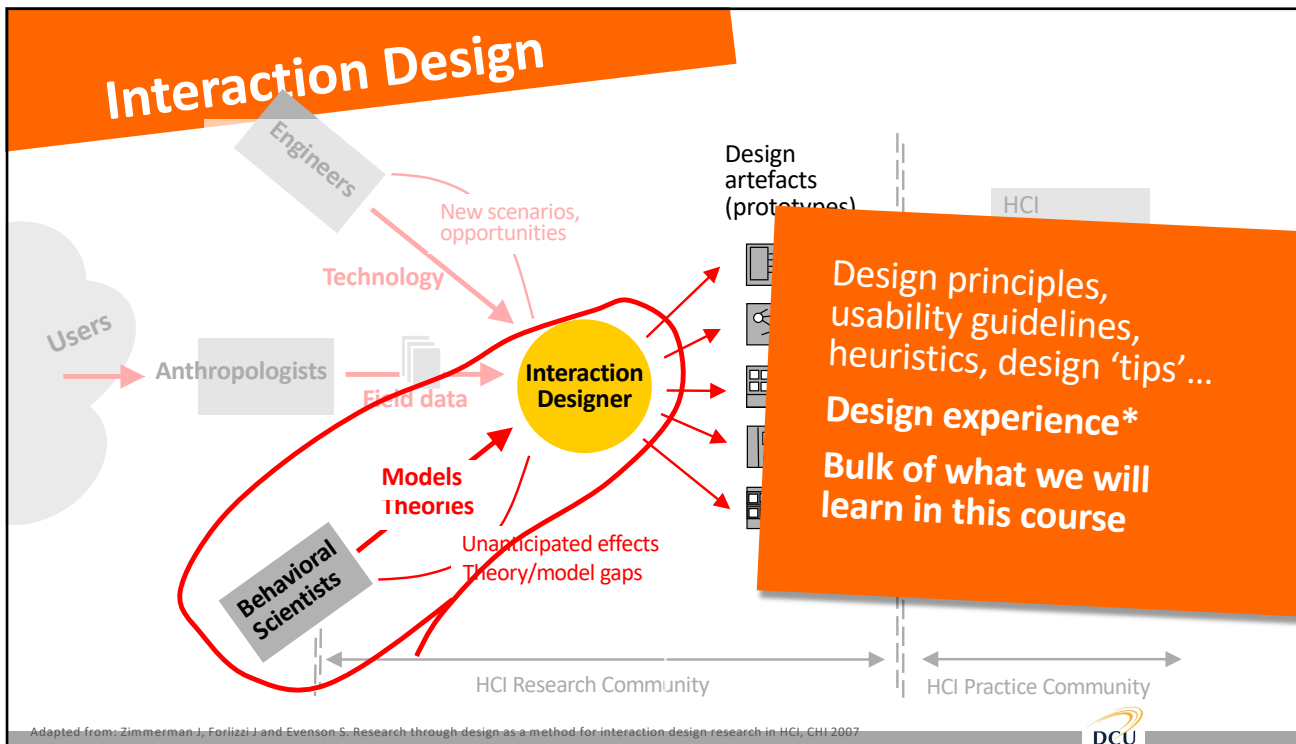

12

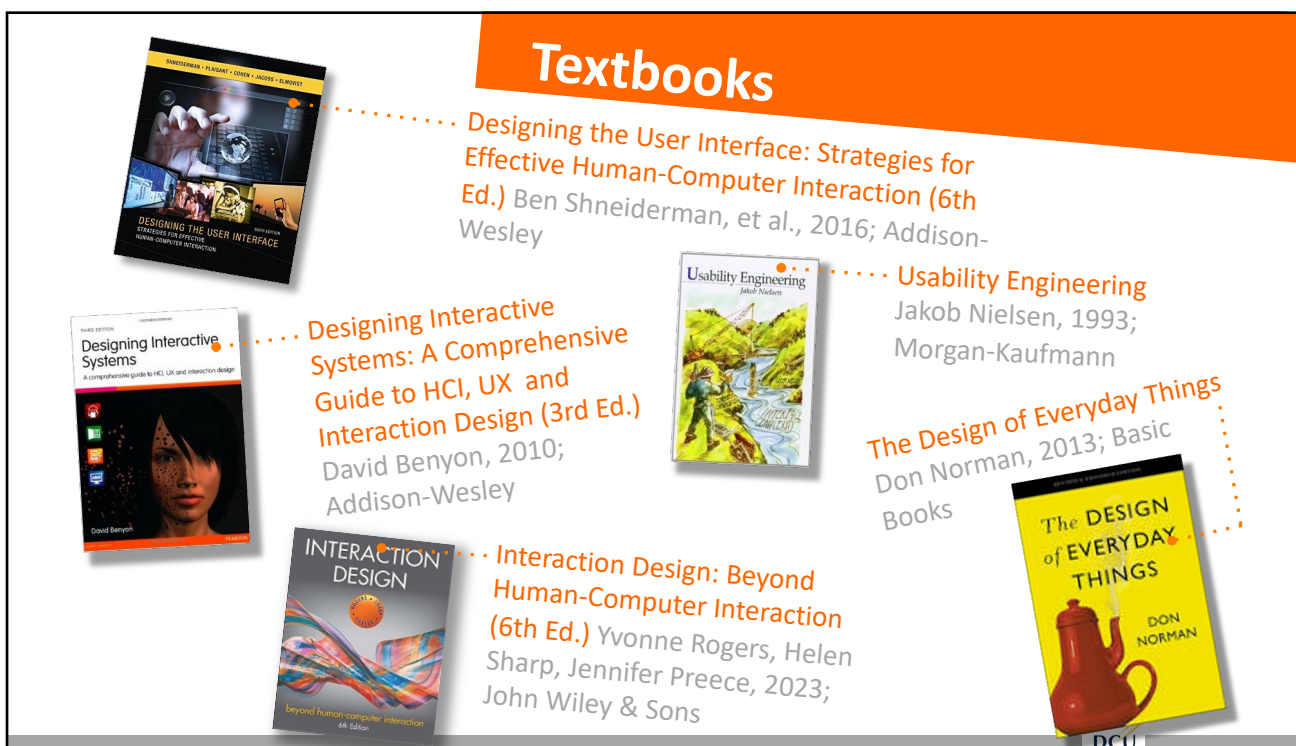

13

14

15

16

UI Design: Aim

“Good designs generate **positive feelings of success, competence, mastery, and clarity** in the user community. The users are not encumbered by the computer, and can predict what will happen in response to each of their actions. When it is well designed, the **interface almost disappears**, enabling users to concentrate on their work, exploration, or pleasure.”

- Ben Shneiderman
University of Maryland

17

Student Support

- Study stress
- Worry
- Anxiety
- Depression

:

- There is Student Support in DCU with professional and caring staff...
<https://www.dcu.ie/counselling>
- Counselling (counselling@dcu.ie)
- Confidential

18

Housekeeping

- Student numbers: 206 (as of Wednesday)
- Occasional screencasts to be available
- Journal entry by Friday night
- ***Attend class!

19

WHAT WILL WE LEARN TODAY?

- Understanding what a “good” UI is
- **User classification**
- Knowing what available knowledge we can use to design a “good” UI

20

ACTIVITY (6 min)

*“Is the **Photoshop** UI well-designed?”*

*Supporting the first timer users
(learnability) vs. supporting those
already familiar (efficiency)...*
